

## Drifting Continents Homework

Name: \_\_\_\_\_

Period: \_\_\_\_\_

Use your Drifting Continent study guide to help you answer the questions. Answer each question completely and RTQ.

1. What was Wegener's theory of continental drift? \_\_\_\_\_

---

---

2. How did Wegener use evidence based on fossils to support his theory that the continents moved?

---

---

---

3. Coal deposits have also been found beneath the ice of Antarctica. But coal only forms in warm swamps. Use Wegener's theory to explain how coal could be found so near the poles.

---

---

---

---

4. What are the three types of evidence Wegener used to support his theory of continental drift?

---

---

---

5. Cut out the continents on the next page and put them together to form Pangaea.
